

Level 2

2022 Advanced Complete Lymphoedema Course

The Complete Level 2 Advanced Lymphoedema Management Course is a hybrid model for course delivery. It comprises of self-paced online, virtual sessions and the face to face component. This model enables the learner to have the best possible learning experience and makes sure that precious face to face time is used for fine tuning practical skills, collaborating together on problems through analysis and deconstructing it and together developing new ideas.

Self-paced Distance Learning

The self-paced distance learning component is included via the Lymphoedema Educations Solutions (LES) online management system and via the e-learning modules provided by Klose Training www.klosetraining.com. It includes readings, online presentations and activities to assist you in developing knowledge on various topics. Your prior learning will influence how much time you will need to spend on each section. There are some activities that will require you to participate in an online discussion with other course participants. The distance learning component is compulsory and will prepare you for the face to face study days. It must be completed prior to the face to face study days.

Virtual Sessions

The five virtual sessions are designed to interactively

explore various aspects of assessment and management prior to the face to face component. They are facilitated by experienced lymphoedema practitioners and delivered by experts in their fields.

Face-to-Face Master Classes

This consists of 4.5 days of master classes. These days are about developing your clinical reasoning and skill acquisition. Dissemination of information and skills is via lectures, activities, practical workshops and group discussion. It is an excellent opportunity for therapists to share their knowledge, skills, ideas and have a forum to troubleshoot difficult aspects of lymphoedema management.

Participants are required to have 100% attendance throughout the face-to-face component.

Assignments

The assignments are evidence of your clinical reasoning for your chosen case study. The assessment part of the case studies will be discussed as part of a virtual session. The second assignment allows the learner to reflect on both the virtual sessions and face to face days and make changes, if required.

Key Dates

Fri 17th June **Start Self-Paced Online Learning**

Fri 15th July **1st Clinical Reasoning Assignment** due for a complex upper or lower limb case study

Thus 28th July **Virtual Session I**

Topic: Q & A session - Treatment Planning Utilising ICG Fluoroscopy

Presenter: Dr Vani Prasad

Time: 7.30 – 9.00pm AEST

Thurs 4th Aug

Virtual Session 2

Topic: Upper limb lymphoedema: Getting the most out of your assessment for complex cases
Facilitators: Maree O'Connor and Sarah Harmon
Time: 7.30 – 8.30pm AEST

Thurs 11th Aug

Virtual Session 3

Topic: Lower limb lymphoedema: Getting the most out of your assessment for complex cases
Facilitators: Maree O'Connor and Sarah Harmon
Time: 7.30 – 8.30pm AEST

Fri 26th Aug

Coban 2 Basic Techniques

Upload videos to the relevant course lesson no later than this date - If you have already attended a 3M basic Coban 2 course or LES Level 1 Lymphoedema Course, provide videos demonstrating bandaging an arm with fingers and fanning and as well as a below knee application with boot.

Thurs 1st Sept

Virtual Session 4

Topic: Head and Neck assessment
Speaker: Jodie Rundell
Time: 7.30 – 8.30pm AEST

Mon 5th Sept

Virtual Session 5

Topic: Q & A session - The use of laser and intermittent pneumatic compression in the management of lymphoedema
Speaker: Sharon Tilley
Time: 7.30 – 8.30pm AEST

Wed 7th Sept to
Thurs 8th Sept

Face-to-Face Master Class

Head and Neck
Time: Wed 7th Sept 8.00am – 5.30pm and Thurs 8th Sept 8.00am - 1.00pm
Location: The Tudor 1101 Whitehorse Road, Box Hill

Fri 9th Sept to
Sun 11th Sept

Face-to-Face Master Class

Upper Limb and Lower Limb
Time: Fri 9th Sept – Sun 11th Sept 8.00am – 5.30pm
Location: The Tudor 1101 Whitehorse Road, Box Hill

Sun 9th Oct

2nd Clinical Reasoning Assignment due for a reflection of a complex upper or lower limb case study
